

DIFFERENT THEORETICAL APPROACHES ABOUT EUROPEAN STUDIES¹

*Mariana BUDA**

Abstract. *The European Studies, as a discipline of study or specialization, is no longer a new-entry in today's Higher Education. All the European countries, but even countries from the others continents, have introduced this discipline in their curricula. The aim of this article is to present and to analyse different theoretical approaches that have existed during the time in Europe and have conducted to the specialization of European Studies that we know today. The Bibliography in this domain is much extended, that's why we assume the risk and we do not pretend to be exhaustive with this classification. Otherwise, our study is a faithful representation of a theoretical basis.*

Keywords: *European Studies, European Union studies, European integration studies, core curricula in European Studies, teaching European Studies*
